Learning experience:

Each Automotive programme consists of a range of units that make up the course of study and is delivered across a normal school term.

Each unit is assessed by way of a written exam and an online multiple-choice test. Your automotive course will be part of a larger study programme including a personal skill building tutorial, plus maths and English if required.

You will have multiple opportunities for hands on work experience and automotive related trips. You may also have industry experts taking your class, giving you a chance to really get under the skin of the sector; as well as working every year with a wide range of equipment manufacturers.

STUDENT SPOTLIGHT

Kieran Misell

Attended: Longdendale High School
Study Programme: Level 1 in Vehicle
Maintenance and Repair Principles

Progression: Level 2 in Vehicle Maintenance
and Repair Principles (Apprenticeship)

“I started on the Level 1 Diploma Vehicle Maintenance and Repair Principles course and I soon progressed into an Apprenticeship with the college at a local garage.

Now I am learning new skills and getting on the job work experience, plus I’m getting paid – it’s brilliant!”
