

T Levels

The Next Level Qualification

T Levels are full-time post-GCSE qualifications that provide you with a perfect balance of classroom learning and real-world experience. The qualification is equal to 3 A levels and highly valued by potential employers.

“EXACTLY WHAT WE LOOK FOR IN FUTURE EMPLOYEES.”

Get The Know-How

T Levels are designed to equip you with the knowledge and skills that the businesses of today need. The qualification has been designed with 250 leading employers, honing the curriculum

to give you a head start into the world of work. 80% of the course is classroom-based, providing in-depth knowledge of your chosen subject. 20% is made up of an industry placement with an employer, giving you priceless hands-on experience.

This powerful combination allows you to gain both theory and practice. We call it the know-how.

One Course, Opens Many Doors

The number of T Level subjects is increasing year on year with 24 courses available by 2023. You pick one to focus on but each course covers a huge variety of subjects, opening up numerous options and potential career paths.

More Than a Qualification

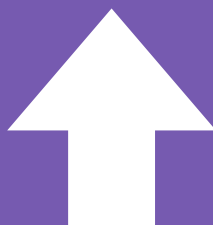

When you pass your T Level, you'll leave with a technical qualification including core theory in your chosen industry, specialist knowledge and skills for an occupation, a grade 4 in English and maths and valuable industry experience with a relevant employer.

From Here You Can Go Anywhere

T Levels open up your options. The qualification provides the same UCAS points as 3 A levels. You can choose to go onto higher education, including university or a higher apprenticeship, or continue straight into the workplace. Your options, your call.

Take it to the next level.
